

PRO RELAX

Plant-based relaxation droplets

The solution to use for restless, excitable or anxious dogs and cats.

There is a range of situations where your dog or cat suffers a degree of stress. Examples include, for instance, fireworks (New Year's celebrations), storms, visits to the vet, travelling, changes to their living situations, accidents, operations and many more.

With the use of a purely plant-based product, you can increase the capacity of your pet's nervous body and nervous system to deal with these situations.

Feeding recommendation

The droplets are administered directly into the mouth or mixed into food.

In acute cases, administer the droplets at intervals of 2 hours and 1 hour prior to a potentially stressful situation. Alternatively 2-3 times daily over the course of five days.

Cats:

7 - 12 droplets (dependent on the weight of the cat)

Dogs:

up to 20kg: 10-20 droplets

21 - 40kg: 20-40 droplets

41-60kg: 40-50 droplets

The dosage to be administered and the frequency can be increased as you desire.

Ingredients

Water, extracts of: Crataegus oxyacantha (hawthorn), passiflora incarnata (plant related to the passion flower family), lavandula angustifolia (lavender), citrus aurantium (bitter orange), dextrose

Ingredient profile

0.5 % raw protein, 0.3 % raw oils and fats, 0.3 % raw fibre, 0.2 % crude ash
